

Changes across public release versions of NIDS-CRAM Wave 3

1. V1.0.0 to V2.0.0

1.

| | |
|---------------------------------|--|
| Dataset | NIDS-CRAM |
| Variable | <i>w3_nc_ems_oct</i> (and some variables thereafter in Section C of the questionnaire). |
| Change | Some cases needed to change from “2. No - I'm employed” to “No, I did nothing”. |
| Reason for change | Due to a Zulu translation error. |
| Number of observations impacted | 20 |
| Notes | The result of following the skip patterns was that the next questions in the skip sequence needed to be changed to “-3. Missing” or system missing, where appropriate. |

2.

| | |
|---------------------------------|---|
| Dataset | Derived |
| Variable | <i>w3_nc_empl_stat</i> |
| Change | 20 observations changed from “3. Employed” to -8. “Refused”. |
| Reason for change | This is a derived variable and the underlying variables changed due to a translation error in Zulu. |
| Number of observations impacted | 20 |

3.

| | |
|---------------------------------|---|
| Dataset | NIDS-CRAM |
| Variable | All variables after section A. |
| Change | Data set to system missing. |
| Reason for change | 5 non-response respondents had some data filled in for the first few questions. In error, these were not previously set to missing, as is required. |
| Number of observations impacted | 5 |

4.

| | |
|---------------------------------|---|
| Dataset | Derived |
| Variable | <i>w3_nc_pweight_s</i> |
| Change | Added to derived data file. |
| Reason for change | Weights were scaled to the NIDS Wave 5 population totals and the weights algorithms were updated. |
| Number of observations impacted | All. |

5.

| | |
|---------------------------------|---|
| Dataset | Derived |
| Variable | <i>w3_nc_pweight_extu_s</i> |
| Change | Added to derived data file. |
| Reason for change | Weights were scaled to the NIDS Wave 5 population totals and the weights algorithms were updated. |
| Number of observations impacted | All. |

6.

| | |
|---------------------------------|--|
| Dataset | Derived |
| Variable | <i>w3_nc_bp_pweight_s</i> |
| Change | Added to derived data file. |
| Reason for change | Weights were scaled to the NIDS Wave 5 population totals and the weights algorithms were updated. One component of this weight is the Wave 1 weight, which is scaled in this version of the balanced panel weight. |
| Number of observations impacted | All. |

7.

| | |
|-------------------|---|
| Do file | Program 1c - NIDS-CRAM - Deflators_W3 |
| Change | Changed name from "Deflators_NIDS-CRAM_W3". |
| Reason for change | Differentiating program numbers from NIDS and improving numbering across NIDS-CRAM waves. |

8.

| | |
|-------------------|---|
| Do file | Program 2c - NIDS-CRAM - Employment_Status_W3 |
| Change | Changed name from “Deflators_NIDS-CRAM_W3”. |
| Reason for change | Differentiating program numbers from NIDS and improving numbering across NIDS-CRAM waves. |

9.

| | |
|-------------------|---|
| Do file | Program 4 - NIDS-CRAM - Merging files for a given wave into a cross-section |
| Change | Changed name from “Program 2 - Merging files for a give wave into a cross-section”. |
| Reason for change | Differentiating program numbers from NIDS and improving numbering across NIDS-CRAM waves. |

10.

| | |
|-------------------|---|
| Do files | Program 5 - NIDS-CRAM - Merging all the NIDS-CRAM data into a panel |
| Change | Changed name from “Program 3 - Merging all the NIDS-CRAM data into a panel”. Changed hardcoded latest wave to dynamic latest wave. |
| Reason for change | Differentiating program numbers from NIDS and improving numbering across NIDS-CRAM waves. The dynamic latest wave obviates the need to change the latest wave number. |

11.

| | |
|-------------------|---|
| Do files | Program 1 - NIDS-CRAM - Deflators_NIDS_W5 Program 3 - NIDS-CRAM - Merging NIDS and NIDS-CRAM |
| Change | Added. |
| Reason for change | Provision of same types of do files in each wave. |

2. V2.0.0 to V3.0.0

1.

| | |
|---------------------------------|--|
| Dataset | Derived |
| Variable | <i>w3_nc_pweight_s</i> |
| Change | Weights updated. |
| Reason for change | Weights updated as a result of outcomes in Wave 5. |
| Number of observations impacted | 6130 |

2.

| | |
|---------------------------------|--|
| Dataset | Derived |
| Variable | <i>w3_nc_pweight_extu_s</i> |
| Change | Weights updated. |
| Reason for change | Weights updated as a result of outcomes in Wave 5. |
| Number of observations impacted | 6130 |

3.

| | |
|---------------------------------|--|
| Dataset | Derived |
| Variable | <i>w3_nc_bp_pweight_s</i> |
| Change | Weights updated. |
| Reason for change | Weights updated as a result of outcomes in Wave 5. |
| Number of observations impacted | 4508 |

4.

| | |
|---------------------------------|--|
| Dataset | NIDS-CRAM |
| Variable | All |
| Change | Minor data cleaning. |
| Reason for change | Minor data quality errors being corrected. |
| Number of observations impacted | 8098 |
